

— YOU JUST WALKED OUT OF THE SAT

Everyone out here is guessing. You **don't have to be.**

Your score won't land for two weeks — and even then it won't tell you what to **do next**.
SEVA works that out the night you finish, from the test you just took.

How **SEVA** works

- 1 It finds out why you miss.**
Every wrong answer sorted into six kinds of mistake — a gap, a trap, a slip, the clock.
- 2 It builds a study plan around your gaps.**
Week by week, in the order that wins back the most points. Prove a skill and it drops off.
- 3 It drills the exact question types costing you points.**
2,200+ practice questions and 12 adaptive full-length tests, aimed at your gaps.
- 4 An AI tutor works the problem with you.**
Step by step, any hour. It already knows what you missed, and why.

All of it is built from your test, not a template. Two students with the same score get different plans, because they lose points for different reasons.

POINT YOUR CAMERA HERE

Find out **tonight.**

About an hour, on your phone. You'll finish knowing exactly which skills cost you points today — and what to do first.
