

— YOU JUST WALKED OUT OF THE SAT

Everyone out here is guessing. You **don't have to be.**

Your score won't land for two weeks — and when it does, it is **a number, not a plan.**
SEVA turns the test you just took into one, tonight.

How **SEVA** works

- 1 It names why you missed, question by question.**
Six kinds of mistake — a gap, a trap, a slip, the clock. You cannot fix “I got it wrong.”
- 2 Your plan is built from that, not from a template.**
Week by week, biggest point-winners first. Prove a skill and it drops off; the next gap moves up.
- 3 It drills those exact question types.**
2,200+ questions and 12 adaptive full-length tests, aimed at your gaps — not another worksheet.
- 4 An AI tutor that already knows what you missed.**
Works the problem through with you at 11pm, without you having to explain yourself first.

More practice tests will not tell you why. You can take five more and lose the same points for the same reasons. Naming them is the part that moves your score.

POINT YOUR CAMERA HERE

Find out **tonight.**

One hour tonight, on your phone. You finish knowing which skills cost you points today, which mistakes were avoidable, and what to work on first.
